

Overlap of Vacated & Remaining Critical Habitat Designations For Pacific Salmon and Steelhead

~ vacated critical habitat designations for 19 vacated ESUs, and overlap of remaining designations for 6 unaffected ESUs ~

* ESUs whose critical habitat is completely overlapped by that for the unaffected 6 ESUs

** ESUs whose critical habitat is partially overlapped by that for the unaffected 6 ESUs

- Approx. 60% of CA Central Valley steelhead critical habitat is overlapped
- Approx. 45% of Central CA Coast steelhead critical habitat is overlapped
- CA Central Valley spring-run chinook critical habitat is overlapped for the Sacramento River only (not tributaries).

~ See the April 30, 2002, court order vacating the critical habitat designations for 19 ESUs and remanding the designations to NMFS for new rulemaking. (<http://www.nwr.noaa.gov/1habcon/habweb/VacatedCH/ckkcdok.pdf>).

~ This map is provided for illustrative purposes only. For specific information on designated areas please consult the source documents (available at <http://www.nwr.noaa.gov/1habcon/habweb/VacatedCH/SourceDocs.html>) or contact the NMFS Northwest Region Habitat Conservation Division at (503) 231-6880.
